

## What's happening in 4HK and 4CS?

4HK and 4CS have had a very busy term.

The students have been learning some cool dance moves with Miss Hodge and making up their own groovy moves.

They have been experimenting in Science with chemical and physical changes and making volcanoes with Mrs Morris.

They have been designing and making some very creative 'Water Catchers' with Mrs King.

They have also been learning all their mapping skills such as compass points, grid references and drawing to scale with Mrs Sommerlad.

The students had a fantastic time in Week 9 when they attended the Bicycle Education Centre at Ashmore learning about riding their bikes safely on the road.
