

Is that an insect?

This term 2KF and 2JL are investigating the exciting world of insects. We have learnt that insects have 3 body parts - head, thorax and abdomen. We've also learnt that insects have 6 legs.

In week 5 we will be having a visit from a beekeeper and we look forward to learning more about life in a hive, bee life cycles and the roles of different bees. We'll also get to sample some fresh honey. YUM!

We are busily learning how to write information reports about different insects and are enjoying caring for our own insect species in our classrooms.

So if you see us around the school grounds using our magnifying glasses you will know what we are doing..... trying to answer the question "Is that an insect?"
