

Environment club (Nature smarts group)

The student environment club provides opportunities for students in years 5 to 7 with the opportunity to get involved in activities that increase environmental awareness. Members are student representatives from each class in the upper school. They meet, to plan ways to educate the school community in environmental issues concerning energy, waste, water and biodiversity. They work towards improving the schools environment and involve the school in taking part in community events such as Clean up Schools Day, National Tree Day and VISY paper recycling.
